

Abdul Rehman

AI/ML Engineer — Software Developer

📍 Lahore, Pakistan

☎ +92 322 5455658 — ✉ abdulrehmantahir142@gmail.com — 🌐 abdulrehman142 — 🌐 abdul-rehman2020

Experience

Telenor Pakistan

Jun 2026 – Jul 2026

B2B Intern

- Assisted in enterprise telecom analysis across 4 client site visits, enhancing requirement mapping and improving solution positioning for B2B accounts.
- Contributed to 3 enterprise pitching sessions and contract discussions, supporting more structured and effective client engagement workflows.

Tintash

Jul 2025 – Sep 2025

Web Development Intern

- Engineered responsive frontend interfaces using React and TypeScript, improving UI consistency across multiple devices and screen sizes.
- Implemented reusable components, dark mode, and UX enhancements, resulting in 30% improvement in user experience based on project feedback.

Punjab Information Technology Board (PITB)

Jul 2025 – Aug 2025

AI Engineering Intern

- Developed an OCR-based document intelligence pipeline using CNN architectures and OpenCV for automated text extraction from scanned documents.
- Optimized preprocessing and recognition pipeline, achieving 20% improvement in OCR accuracy through noise reduction and image enhancement techniques.

Technical Skills

AI/ML: PyTorch, TensorFlow, Keras, Scikit-learn, CNNs, OCR, Transfer Learning, Model Deployment

MLOps: MLflow, DVC, AWS S3, Docker

Backend: FastAPI, Node.js, Express.js, REST APIs, Authentication

Frontend: React.js, Next.js, TypeScript, Tailwind CSS

Education

FAST National University of Computer and Emerging Sciences

2023 – 2027

BS Computer Science

Projects

Medirator – AI Healthcare Platform

Live

- Engineered a multi-feature AI healthcare system including X-ray diagnosis (CNN-based), symptom-based disease prediction, and medical assistance workflows.
- Deployed ML models on Hugging Face, enabling inference for structured symptom inputs (377 symptoms) and multi-class classification tasks.
- Designed an accessible UI with family medical history visualization, dark mode support, and multilingual features for improved usability.

Curator – AI Wardrobe Assistant

- Designed a fashion recommendation system using YOLO and similarity learning, generating outfit suggestions based on mood, preferences, and weather conditions.
- Implemented an MLOps pipeline using MLflow, DVC, and AWS S3 for model tracking, versioning, and scalable deployment.

Fixify – Service Marketplace

Live

- Developed a full-stack service marketplace supporting 9 core service categories and multiple sub-services for seamless client-provider interaction.
- Built a scalable platform using React, TypeScript, Tailwind CSS, FastAPI, and MariaDB with authentication and role-based access control.

Certifications

- AWS Academy Cloud Foundations
- Aspire Leadership Program 2026
